

ARISTO-PLAQUE

Make your favorite pictures "forever"

Aristo Cast normally produces lost wax investment castings made from production aluminum tooling, or prototypes made from furnished math data. We have now developed a process where we can start with nothing but a photograph and produce a plaque in aluminum, bronze or stainless steel.

The plaques are 2.5 D and are suitable for display using a standard wire frame hanger or can be professionally matted & framed if the respective size allows.

- "Picture Perfect"
- Indoor/Outdoor use
- Lifetime Satisfaction Guarantee

ARISTO CAST
INVESTMENT CASTING

This process can be used to duplicate, in metal, many varied scenarios - pictures of loved ones, events, pets, memorials and commemoratives. Currently the sizes are up to 7.6 x 10, but can be made larger on an individual basis. All sizes are approximate.
